

An innovative Vermont-based management consulting firm, **The Viridis Group LLC** is dedicated to serving the emerging (small-to-midsized) biotechnology/biopharma company, academic-based biomedical researchers and investment capital providers in the discovery, research, development & commercialization of new and novel technologies and products.

The Viridis Group LLC facilitates the commercial development of biomedical products in three primary service areas:

- serving the *emerging* biotechnology firm, notably in but not limited to the therapeutic areas of oncology, immunology, infectious disease & genetics/genomics,
- developing strategic relationships between academic investigators & private-sector biomedical firms, and
- providing due diligence to venture capital firms & angel investors on both the scientific and business viability of biotech companies they are evaluating.
